

# Unit 2

## Population

# Population

- Demography
- Spatial Distribution and Movement
  - Where are they?
  - Where are they going?

# Population

- Scale of inquiry
  - Global
  - International
  - National
  - Local

# Population

## ● Global Trends

- Where are they growing fastest / slowest?
- Identify trouble areas

# Population

• Fastest Population Growth = Poorest Regions

- Asia
- Africa

# Population

- Population Numbers

- Intelligent Inquiries

- Population Equations

- Global Population Accounting Equation
  - Total global population
- Sub global Population Accounting Equation
  - Total Population of a Region

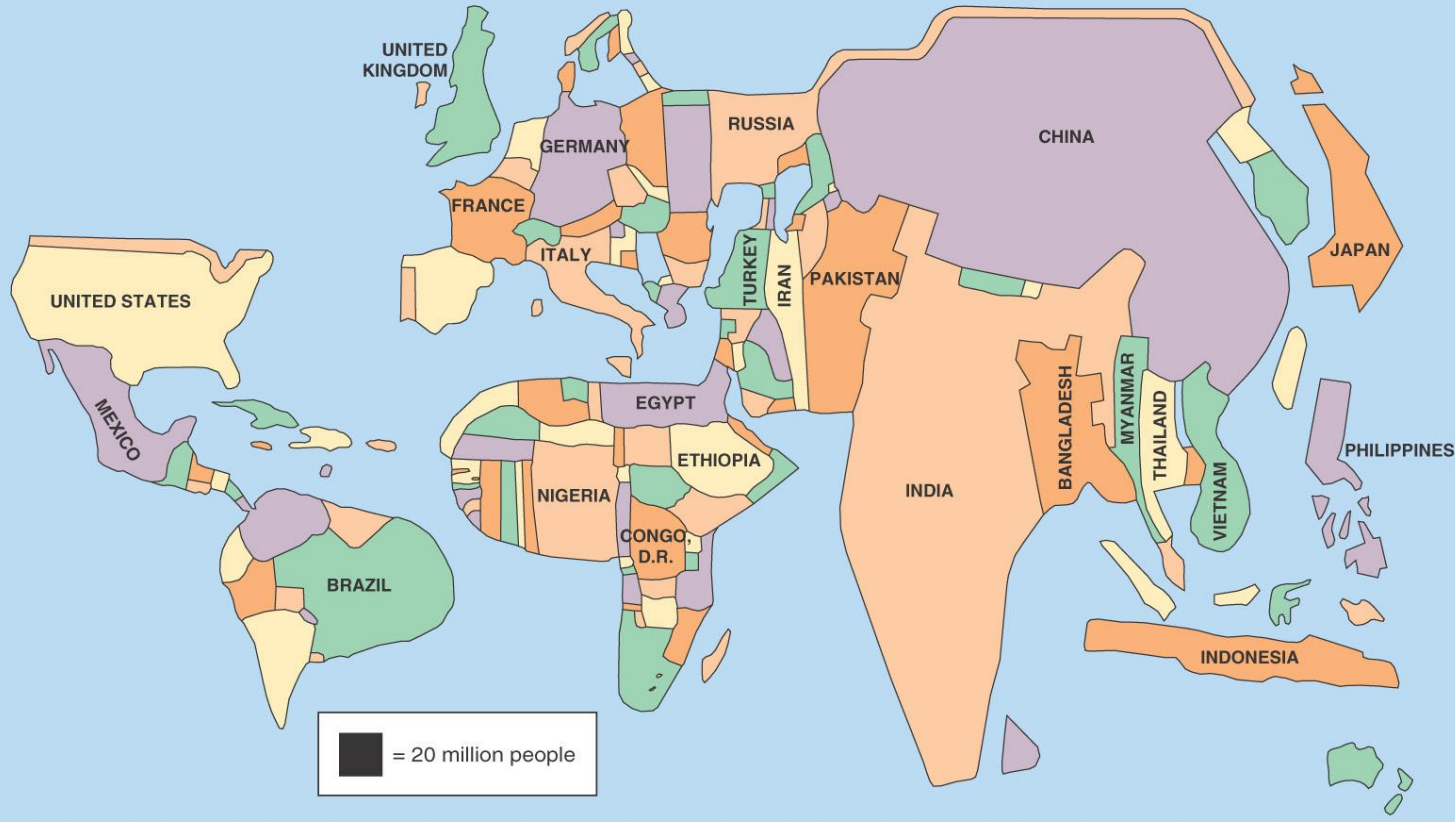

# Population

## Equations

- Global Population Accounting Equation
  - Original Population + Births – Deaths
- Sub global Population Accounting Equation
  - Original Population + Births – Deaths + Immigration – Emigration
  - Immigration – move in
  - Emigration – move out

# Population

- Population Distribution
  - Where are people?

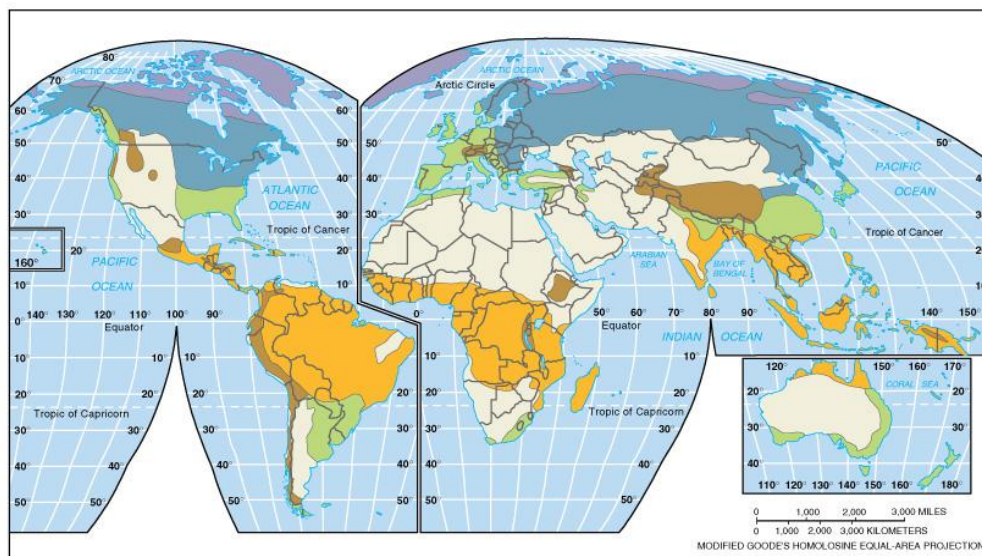

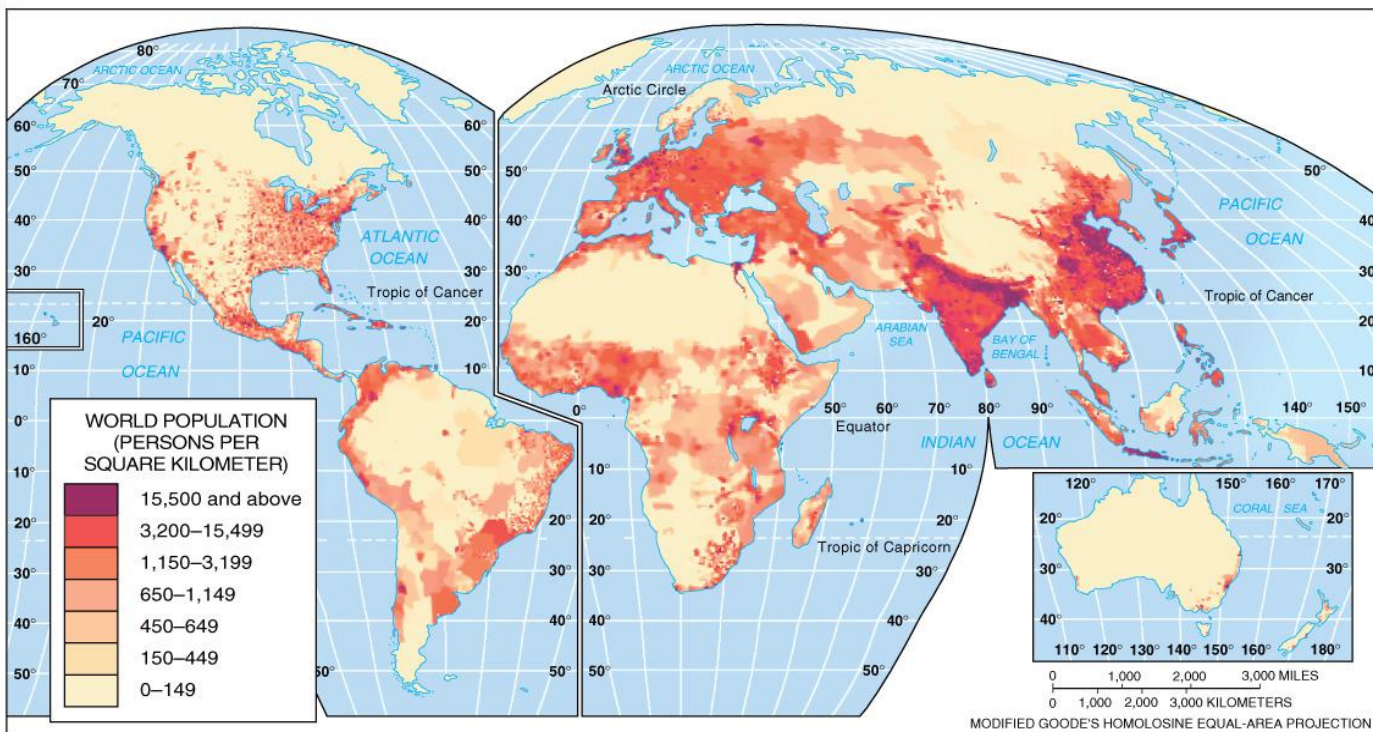

# Population

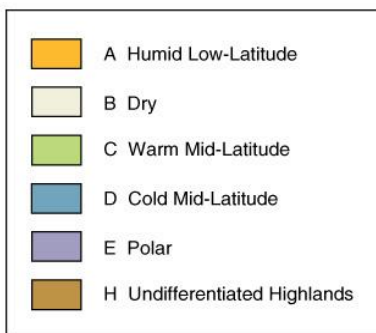

## ● Population Distribution

- Environmental factors
  - Too Cold
  - Too Wet
  - Too High
  - Too Dry

# Population Distribution

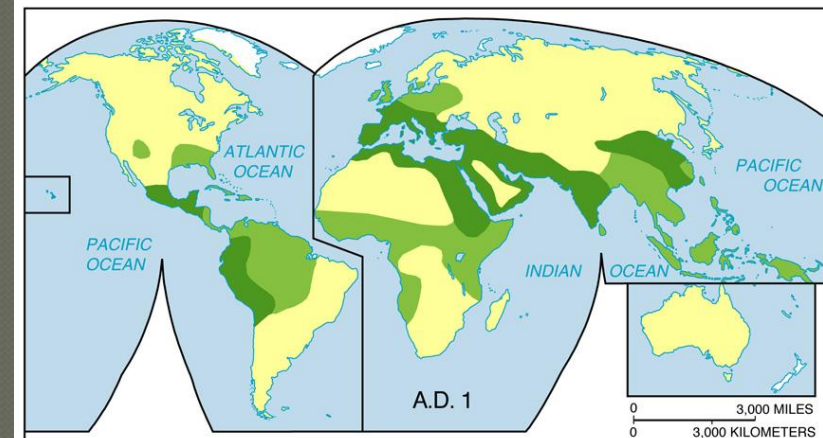

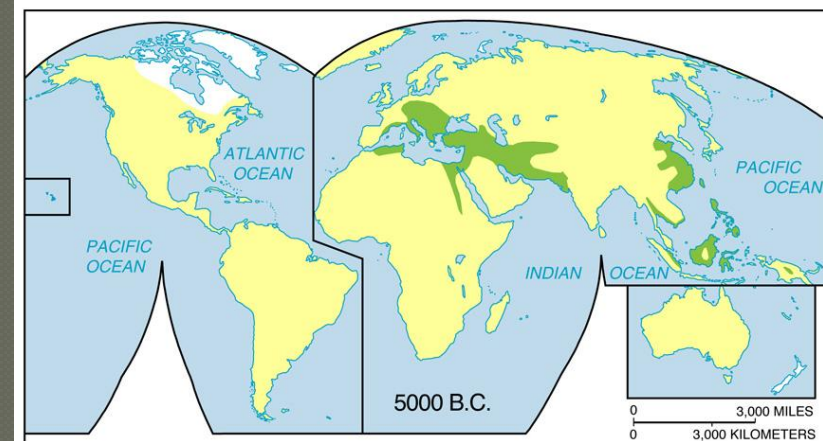

- 75 % on 5 %
  - Specific Regions
  - Hospitable Environment

# Population Distribution

## Ecumene

- Area that holds a permanent settlement

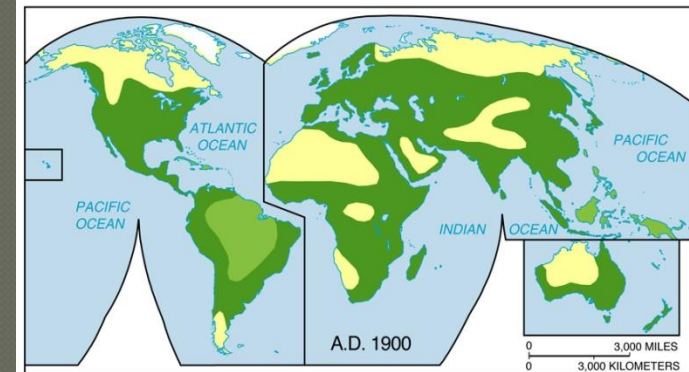

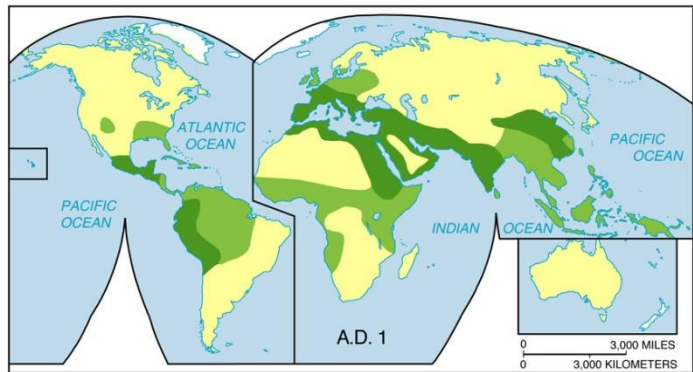

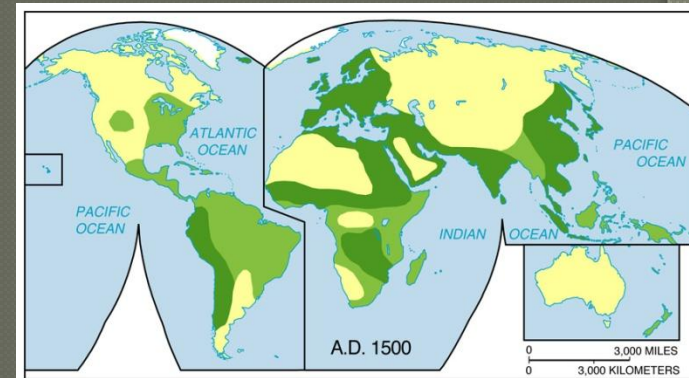

### ECUMENE

	Intensive settlement		Hunting and gathering
	Small-scale agriculture		Uninhabited (mainly ice)

# Expansion of the Ecumene

## 5000 B.C.–A.D. 1900

### ECUMENE

- Intensive settlement
- Hunting and gathering
- Small-scale agriculture
- Uninhabited (mainly ice)

Copyright © 2005 Pearson Prentice Hall, Inc.

### ECUMENE

- Intensive settlement
- Hunting and gathering
- Small-scale agriculture
- Uninhabited (mainly ice)

Copyright © 2005 Pearson Prentice Hall, Inc.

Fig. 2-3: The ecumene, or the portion of the Earth with permanent human settlement, has expanded to cover most of the world's land area.

# Population

## ○ Density

- 3 Types
  - Arithmetic
  - Physiological
  - Agricultural

# Population Density

- Arithmetic

- Total # of people / Total Land Area

- What does this not tell us?

- Population Concentration

# Population Density

- Physiological
  - Total # of people / Total Farmland
- How might this be helpful?

# Population Density

- Agricultural
  - Total # of farmers per unit of arable land
- What different information might this give us?

# Population

- Carrying Capacity
  - How many an area can support
- Factors
  - Wealth
  - Technology
  - Climate

# Population Carrying Capacity

## • Overpopulation

- When a country outgrows it's carrying capacity
- Carrying capacity can be increased
  - Improved technology
  - Better use of land, etc

# Population

- Measuring Population and Population Growth
- CBR
- CDR
- IMR
- Life Expectancy
- Fecundity
- GFR
- TFR

# Population Growth

## ○ CDR

- Crude Death Rate
  - # of Deaths per 1,000 ppl per year

## ○ CBR

- Crude Birth Rate
  - # of live births per 1,000 ppl per year

# Population Growth

## ● IMR

- Infant Mortality Rate
  - # of infant deaths per 1,000 live births
  - Must live 1 year

# Population Pyramid

## ○ Dependency Ratio

- Help to analyze work force / age distribution
- 15 – 64
  - Independent
- $15 > x > 64$ 
  - Dependent

# Population Pyramid

## ○ Dependency Ratio

- Too High = problem
- Too many dependents = strain on society
  - Strain on social services
  - Fewer workers available for each dependent
- General problems
  - MDC's – Too many old
  - LDC's – Too many young
    - Especially parts of Africa that have been hits by AIDS

# Unit 2

## Population

# Unit 2

## Population

# Population Through Time

- Beginning until 1750
  - Modest population growth
  - 700 million in 1750
    - Wars, disease, draught, famine
    - High birth and death
  - Current
    - 6.8 billion

# Human Population 1 AD - 2050 AD

\*Projected

# Population Through Time

- Ages of Population Growth
  - 1<sup>st</sup> Agricultural Revolution
  - Domestication of Animals / Crops
    - Move from hunter gatherer -> farmer

# Population Through Time

- 1<sup>st</sup> Agricultural Revolution
  - More food = more people

# Population Through Time

- Industrial Revolution
  - Use of technology
- 2<sup>nd</sup> Agricultural Revolution
  - Improved farming technology
  - Improved fertilizer
  - Improved food storage

# Population Through Time

- Move toward cities

- Technology creates new jobs

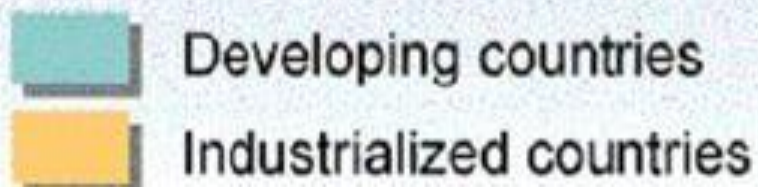

- Other Agricultural Revolutions

- Green Revolution
- Bio Revolution

- Medical Revolution

- Spread of Medical technologies to poor countries

# World population development

# Demographic Transition Model

- Predicts changes in births, deaths, rates of natural increase
  - In the development of countries
- Use CBR, CDR, and Total Population

# Demographic Transition Model

## 4 Stages

- Low Growth
- High Growth
- Moderate Growth
- Low Growth

# Demographic Transition Model

## • Stage 1

- Low Growth
- High CBR and CDR = Low RNI
- Subsistence Farming
- Not industrialized

# DTM

## ○ Stage 2

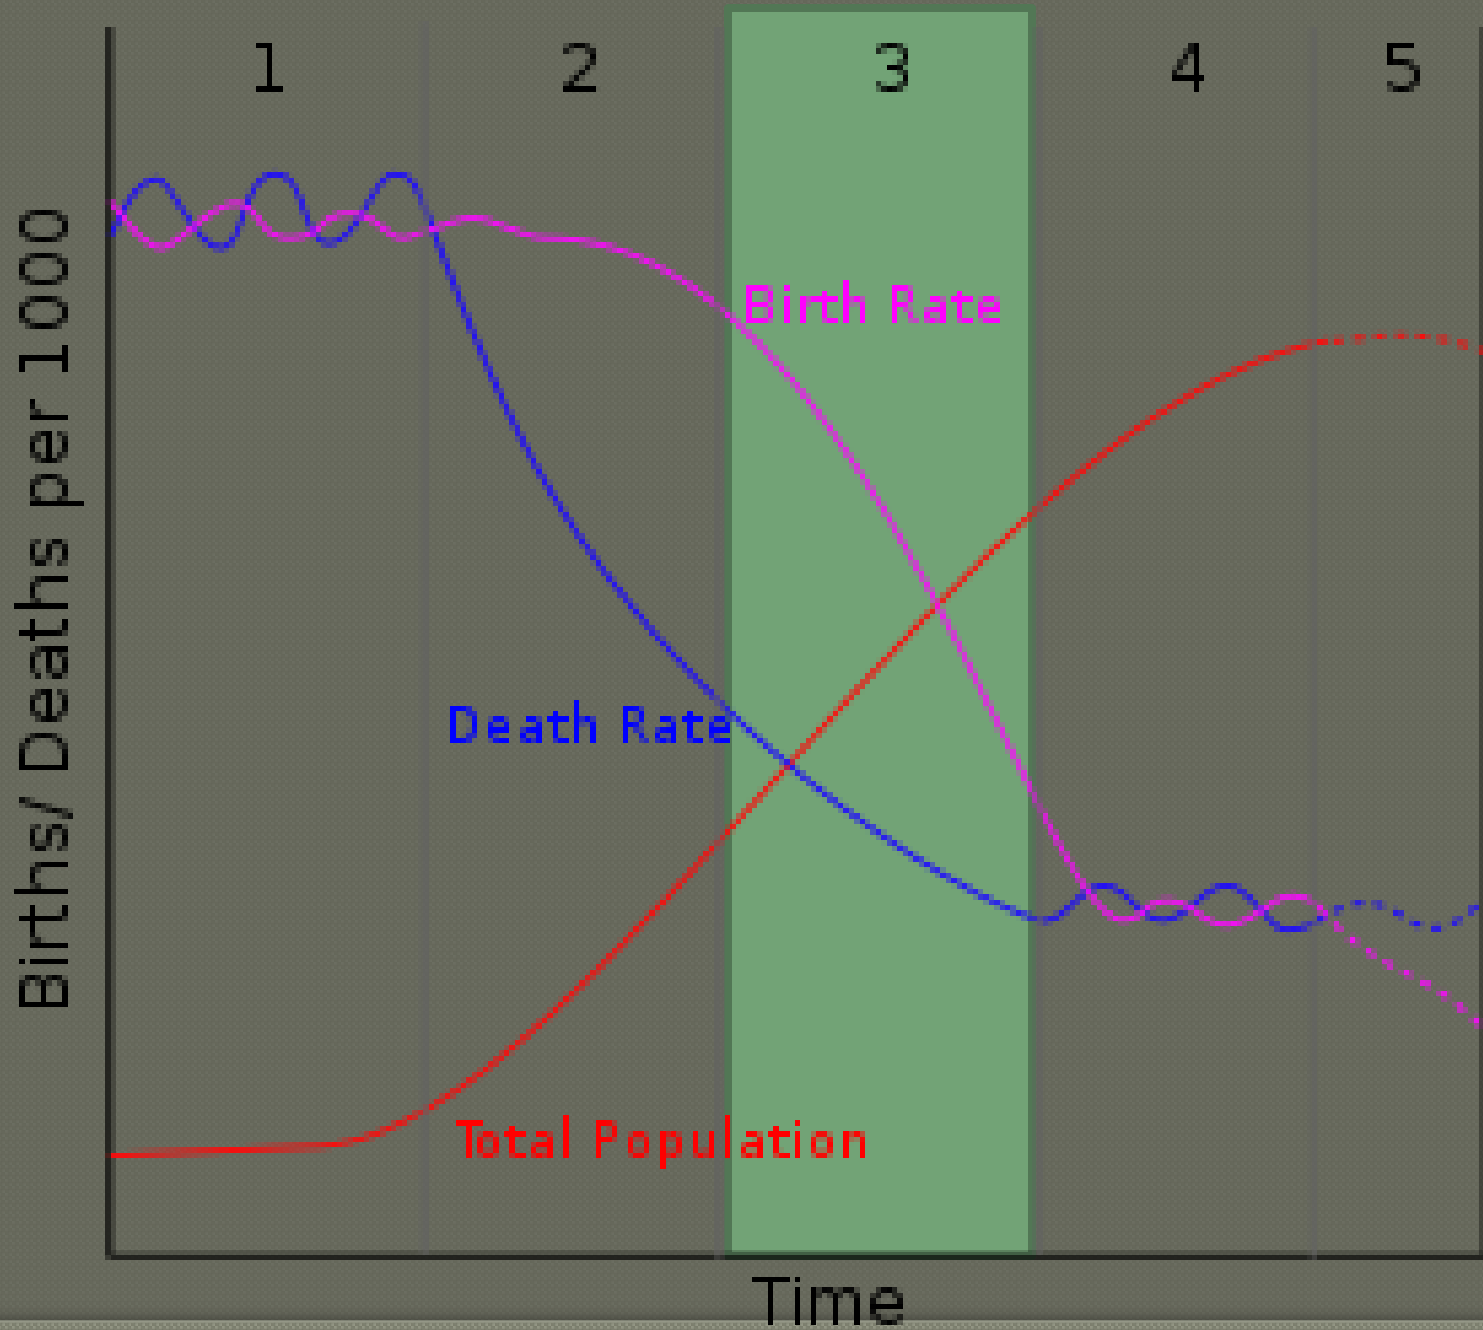

- High Growth
- Declining CDR
  - Improved Technology / Improving Conditions
- CBR stays similar
- Causes High RNI

# DTM

## ○ Stage 3

- Moderate Growth
- Declining CBR
  - Lifestyle Changes
  - Move to cities
  - Smaller Families
  - Women have more “options”

# DTM

## ○ Stage 4

- Low Growth
  - CBR and CDR meet
    - Low levels
  - Low RNI
  - Modern Countries
  - Modern Technologies
  - Low to Zero Population Growth

# DTM

## ○ Stage 5

- Negative Population Growth
- CBR declines below CDR
- Graying Populations

# Unit 2

## Population

# Unit 2

## Population

# Epidemiologic Transition Model

- Correlates with the DTM
  - Causes of death in each Stage

# ETM

## 4 Stages

- Stage 1
  - Poor sanitary conditions
    - Dysentery, Black Plague, Ebola
- Stage 2
  - Overcrowding
    - Cholera, Flu
    - Highly communicable
- Stage 3 & 4
  - Elderly

# ETM

- Stage 5
  - Reemerging Disease
    - Avian Flu, MRSA

# Population Pyramids & The DTM

---

- Basic pyramid shapes correlate to the DTM
- Represent population growth / future population growth
- We can guess what stage of the DTM based on the basic pyramid shape
  - Can also correlate to levels of development

# Population Pyramids & The DTM

---

- Basic Shape 1
  - DTM Stage 2
  - Regular Pyramid
    - High Growth
    - Wide Base

# Population Pyramids & The DTM

---

- Basic Shape 2
  - DTM Stage 3
  - Extended Pentagon
    - Moderate Growth
    - Even base and sides

# Population Pyramids & The DTM

---

- Basic Shape 3
  - DTM Stage 4
  - Column
    - Slow to no growth
    - Even sides

# Population Pyramids & The DTM

---

## ● Basic Shape 4

- DTM Stage 5
- Reduced Pentagon
  - Negative Growth
  - Sides are moving in
  - Indicates falling birth rates

# Population Pyramids & The DTM

---

- Basic Shape 3
  - DTM Stage 3

# Unit 2

## Population

# Population Policies

## ● Government / State Policies

- Try to solve problems
  - Overpopulation
  - Underpopulation
- Increase status of a state
  - For the benefit of the state
  - nationalism

## ● Pronatalist

## ● Antinatalist

# Population Policies

## ● Pronatalist

- Produce larger families
- Larger population

## ● Antinatalist

- Curb population growth

# Population Policies

---

## ○ Pronatalist

- Historical
  - Achieve state goal
    - Conquer territory
    - Meet economic objective
    - Nationalism / Status of the state
- Recent
  - Curb population decline
    - Need to sustain economy / viability of the government
    - Maintain native population
      - Not be overtaken by foreign cultures / populations

# Population Policies

---

## ○ Pronatalist

- Policies
  - Tax incentives
    - Tax credit
    - Tax deduction
  - Cash rewards / prizes
  - Pay for child care / day care

# Population Policies

---

## ◉ Antinatialist

- Over population
  - Cannot sustain population growth
  - Cannot meet the needs of the population and future population
    - Food, Economics
- Controlled and planned economies

# Population Policies

---

## ◉ Antinatalist

- Policies
  - 1 Child Policy
  - Restrictions on family
    - Where they can live, work, etc

# U.S.S.R. - pro-natalist

Starting on July 8, 1944 the government of the U.S.S.R. began awarding medals to women in order to encourage a high fertility rate.

Why did the government believe there was a need for a pro-natalist policy at this time ?

# 3 main categories of medals were presented

- Motherhood Medals
- Order of the Glory of Motherhood  
or  
Order of Maternal Glory
- Order of Mother Heroine

# Motherhood Medal 2nd Class

5 children 8,000,000 awarded

# Order Mother Heroine

10 children

200,000 awarded

# Motherhood Medal 1st Class

6 children

4,000,000 awarded

# Order of Maternal Glory 3rd Class

7 children

2,000,000 awarded

# Order of Maternal Glory 2nd Class

8 children

1,000,000 awarded

# Order of Maternal Glory 1st Class

9 children

500,000 awarded

# Population Theories

- Thomas Malthus
- Karl Marx
- Ester Boserup
- Neo Malthusians

# Population Theories

## • Thomas Malthus

- The earth has a natural limit
- Large populations strain natural resources
- Earth creates “natural checks”
  - War, famine, disease, natural disaster, etc

# Thomas Malthus

## ◉ Positive Checks

- Violent

## ◉ Negative (Preventative) Checks

- Birth Control
- Celibacy

# Thomas Malthus

# Thomas Malthus

---

## ○ Critics Say

- Improved Technology
- Allows more people
  - In less space

CRI online

国际在线·旅游

# Karl Marx

---

- Unequal distribution of wealth
  - Middle and Upper Class
  - Upper Class Exploits Middle Class

# Ester Boserup

- Larger Populations
  - Forces innovation
  - Technological Development
  - More people = more opportunities for problem solvers
    - Human Capital

# Neo-Malthusians

---

- Similar to Malthus

- Only certain parts of the world need to slow growth
- Characteristic of the region
- Provide more room for contraceptions

# Unit 2

## Population

# Unit 2

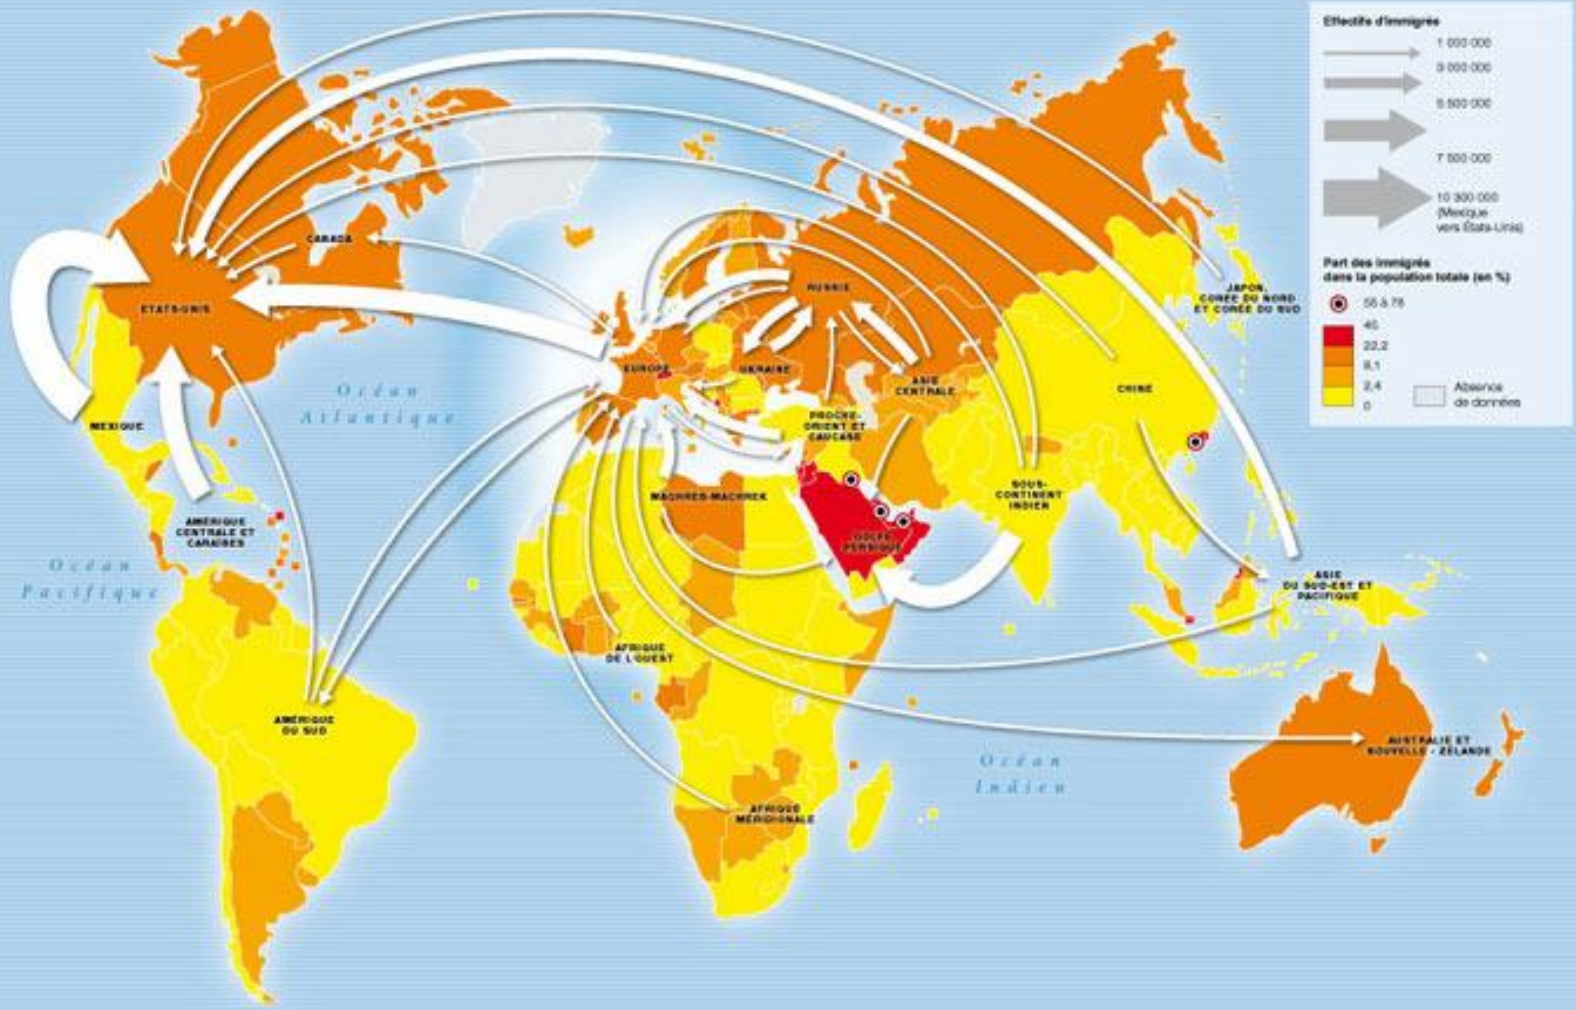

## Population

# Populations Movement

---

- ◉ Increased migration
  - Improved technology / transportation
  - Increased wealth
- ◉ Impact
  - Culture
  - Economics
  - Environment

**Effectifs d'immigrés**

- 1 000 000
- 3 000 000
- 5 000 000
- 7 500 000
- 10 300 000 (Mexique vers États-Unis)

**Part des immigrés dans la population totale (en %)**

- 55 à 75
- 40
- 22,2
- 5,1
- 2,4
- 0
- Absence de données

# Population Movement

---

- Migration

- Permanently move from home region
- Cross to another administrative boundary

# Population Movement

---

- ◉ Immigration
  - Move to a place
- ◉ Emigration
  - Move out of a place

# Population Movement

---

- ◉ Net In-Migration
  - More immigrants than emigrants
- ◉ Net Out-Migration
  - More emigrants than immigrants

# Population Movement

---

- Migration Streams

- Where?
- Why?

- Counter Stream

- Move against the current in migration

# Population Movement

---

- ◉ Push Factor
  - Why they leave
- ◉ Pull Factor
  - Why they come

# Population Movement

---

- Migration Selectivity
  - How likely is someone to migrate
  - Based on:
    - Personal, social, economic

# Population Movement

---

- Age
  - 18 to 30

# Population Movement

---

- Brain Drain
  - Worry of Gov'ts
- More Education
  - More likely to leave
- Brain Drain
  - Most educated leave

# Population Movement

---

- Brain Drain
  - Keep workers from leaving
    - HOPE Scholarship

# Population Movement

---

- Two types of Migration
  - Voluntary
  - Involuntary / Forced
- Refugees
  - Involuntary Migrants
  - Flee persecution or abuse

# Population Movement

---

## ○ Refugees

- International
  - Flee to another
- Intranational
  - Move within the country

# Refugees: Sources and destinations

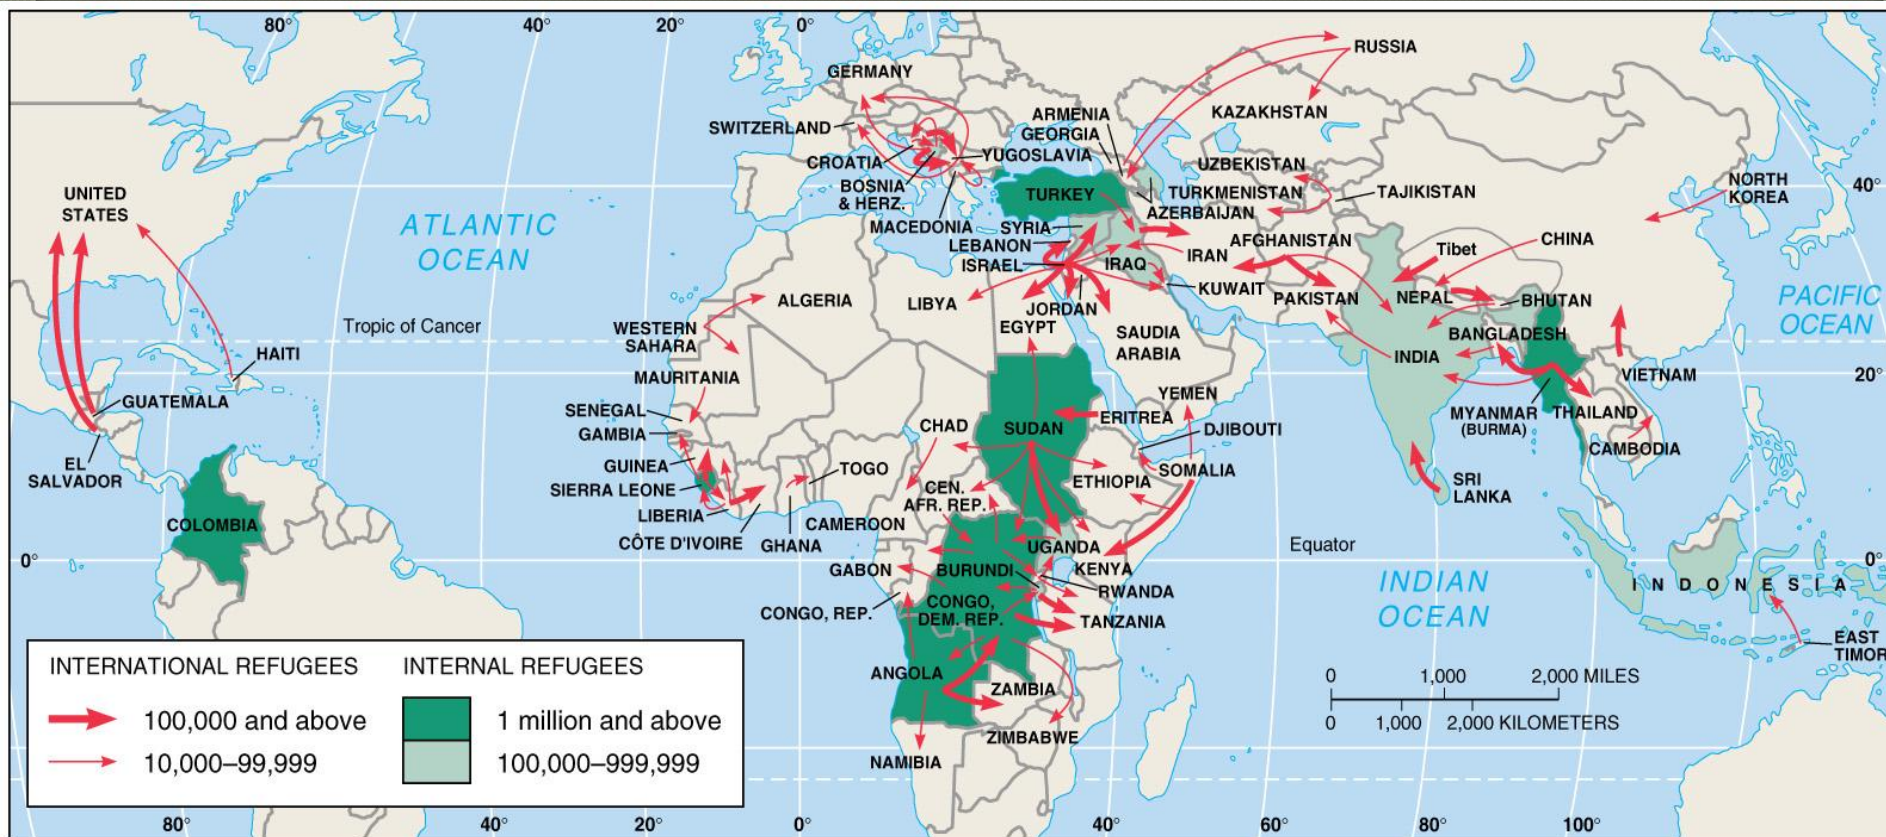

Fig. 3-1: Major source and destination areas of both international and internal refugees.

Copyright © 2005 Pearson Prentice Hall, Inc

# Population Movement

---

## ◉ Internally Displaced Persons

- Refugees who do not move to a new country
- Face all the hardships of a refugee
- Are not given refugee status by the UN
- International support and aid is not required

# Forced Migration around the World

---

- ◉ Sub-Saharan Africa
- ◉ Middle East (SW Asia)
- ◉ Europe
- ◉ South Asia

# Sub Saharan Africa

---

- ◉ Conflict in Rwanda and Congo
  - Tribal and Ethnic Conflict
- ◉ Darfur in Sudan
  - Animist and Muslims

# Sub Saharan Africa

---

- ◉ Zaire, Tanzania, Uganda, Liberia, Sierra Leone, Angola, and Burundi
  - War related relocation

# Mid East / SW Asia

---

- ◉ Palestinians
  - Creation of Israel
- ◉ Kurds in Iraq
  - Under Saddam Hussein
- ◉ Afghans under the Soviets

# Europe

---

- ◉ Yugoslavia
  - 7 million refugees fled to Europe

# SE Asia

---

- ◉ Vietnam War
  - Displacement of Vietnamese
- ◉ Cambodia
  - Khmer Rouge
  - 300,000 Refugees
- ◉ Myanmar / Burma

# South Asia

---

- Sri Lanka

- 1 million displaced by Sinhalese Government

# Movement of People

---

- Generally

- Moving from:
  - Asia, Africa, Latin America
- Moving to:
  - America, Oceania, Europe

# External Migration

---

- ◉ Post World War II
- ◉ Jewish immigrants to Israel
- ◉ East German immigrants
  - To West Germany
  - Soviet Control / Communism

# External Migration

---

- Asian immigrants

- To the US
- From Philippines, Vietnam, and India

- North Africa and Turkish

- To Europe
- Germany and England

# Unit 2

## Population

# Unit 2

## Population

# 3 Migration Waves to the US

---

- Colonial Era
- 19<sup>th</sup> and 20<sup>th</sup> Century
- Late 20<sup>th</sup> Century

# Colonial Era

---

- ◉ 1607 to 1776
- ◉ From Europe and Africa
- ◉ Europeans
  - Religious persecution
  - New life
- ◉ Africans
  - Slave trade

# Colonial Era

---

- Immigrants came to the East Coast

# 19<sup>th</sup> and 20<sup>th</sup> Century 1800's & 1900's

---

- ◉ Ireland and Germany

- ◉ Post Civil War

- Russia and Hungary

# Late 20<sup>th</sup> Century

---

- ◉ 1970s and 1980s
  - Asia
- ◉ 1980s on
  - Latin America

# US Immigration Policy

---

- ◉ Unrestricted
- ◉ Quota Act of 1921 / National Origin Act of 1924
  - Sets limits
  - Non-Western Europeans
  - Based on total number of immigrants
    - 2%
    - 1910 Census

# US Immigration Policy

---

- ◎ 1968
  - Country quotas replaced
  - Hemisphere Quota
    - East – 170,000
    - West – 120,000

# Migration to U.S., by region of origin

Fig. 3-4: Most migrants to the U.S. were from Europe until the 1960s. Since then, Latin America and Asia have become the main sources of immigrants.

Copyright © 2005 Pearson Prentice Hall, Inc.

# US Immigration Policy

---

- ◎ 1978
  - Global Quota
  - 290,000
  - 20,000

# US Immigration Policy

---

- Current Policy

- 620,000
- 7%

# Unit 2

## Population

# Unit 2

## Population

# Internal Migration

---

- Movement within a country
- Two Types
  - Interregional
  - Intraregional

# Internal Migration

---

## ◉ Industry

- Intraregional
  - Rural to Urban
  - Urban to Suburban

# Internal Migration

---

- Crowded Cities

- Counterstream

- Counterurbanization

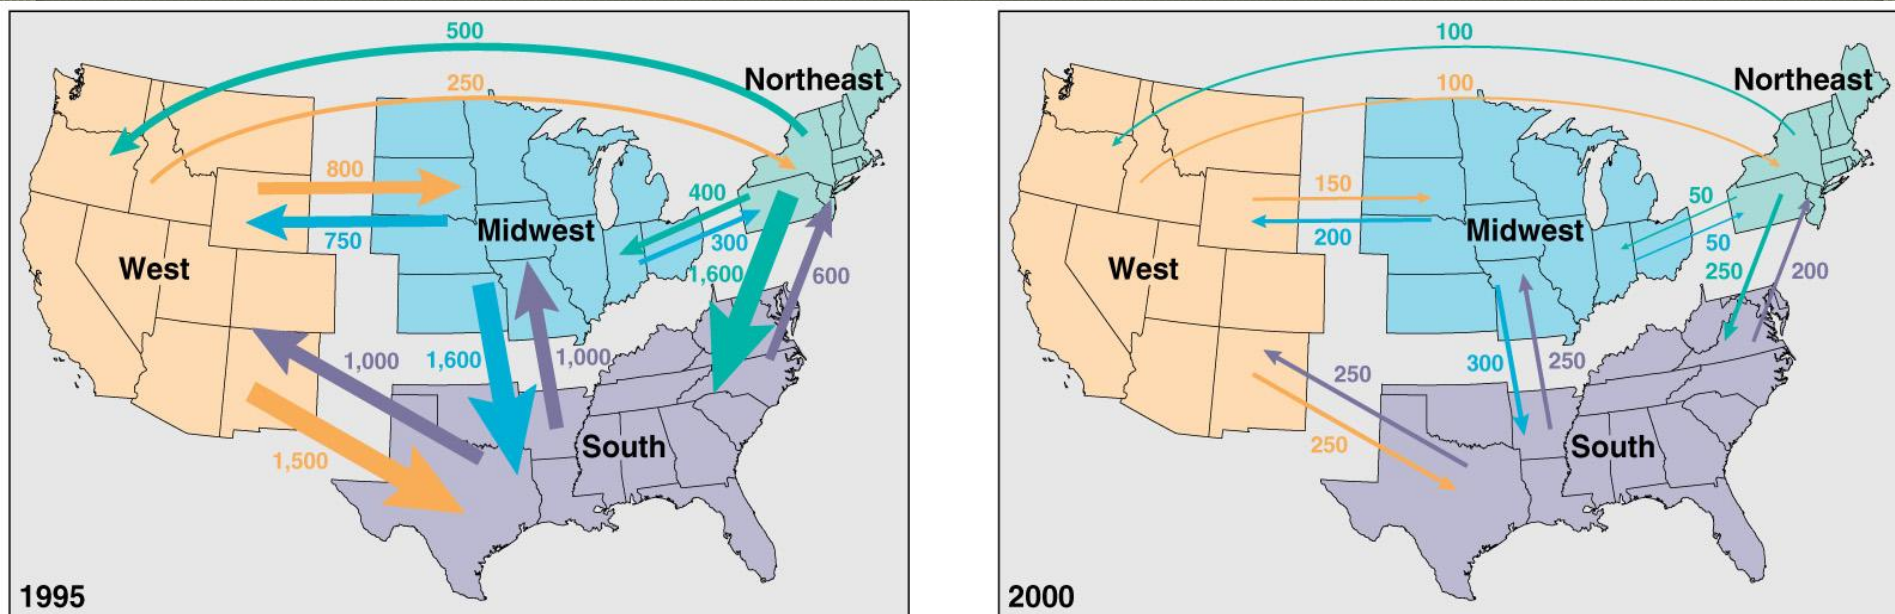

- City to rural
- New transportation / technology / jobs

# Internal Migration

---

- General US Migration
  - Southward and Westward
- Baby boomers
  - Move south
  - Better weather
  - Improved Racial Tensions
- Available Jobs

# Interregional Migration in the U.S.

Copyright © 2005 Pearson Prentice Hall, Inc.

Fig. 3-13: Average annual migrations between regions in the U.S. in 1995 and in 2000.

# Intraregional Migration in the U.S.

Fig. 3-14: Average annual migration among urban, suburban, and rural areas in the U.S. during the 1990s. The largest flow was from central cities to suburbs.

# Migration Models and Theories

---

- ◉ Gravity Model
  - Interaction and movement between places
- ◉ More people =
  - More immigrants
- ◉ Distance is an immigration factor

# Gravity Model

---

- The closer the location
- Think distance decay

# Gravity Model

---

- Does not account for...
  1. Selectivity Factors (Education Level, Age, Job Opportunities)
  2. Unpredictable Human Behaviors

# Ravenstein's Laws of Migration

---

- British Geographer Ernst Ravenstein
  - 11 generalizations
- Short Distances
- Step Migration
  - End goal
  - Stop in between

# Ravenstein's Laws

---

- Intervening Obstacles
  - Keeps one from completing migration
    - 1.
    - 2.
    - 3.
    - 4.

# Ravenstein's Laws

---

- Long Distance Move
  - Large city
- Rural Residents
  - More likely to move
- Young adults
  - More likely to move

# Ravenstein's Laws

---

- Migration creates counterstream

# Chain Migration

---

- Migrate to where others are
- Where they have a connection

# Unit 2

## Population

# Unit 2

## Population

# Model of Migration Transition

---

- Wilber Zelinsky
  - Explain and predict
  - Uses the DTM

# Migration Transition

---

- Each stage of the DTM produces incentives (motives)
- Stage 1
  - Shelter or Food
- Stage 2
  - Resources are used
  - More people
  - Less land available
  - People leave the country

# Migration Transition

---

## ◉ Stage 2

- Move to more developed nations
- Abundant resources

## ◉ Stage 3 & 4

- Intraregional
- Rural to Urban
- Urban to Suburban
- Urban to Rural and back

# Short Term Local Movement & Activity Space

---

- ◉ Space you interact with
  - Activity Space
- ◉ Will depend / fluctuate

# Short Term Movements

---

- 3 Types
  - Cyclical
  - Seasonal
  - Periodic

# Cyclical

---

- ◉ Daily Routine

# Seasonal

---

- ◉ Leave home b/c of season change
- ◉ Seasonal work
  - Migrant Workers
- ◉ Transhumance
  - Pastoral farming
  - Moving animals each season

# Periodic

---

- Longer periods
- College
- Military
- Internship
